

SYSTEM X-SMART

Encrypted full System Two-way Communication Duplex

eSTER_x40

WIRELESS TWO-WAY ROOM THERMOSTAT

cooperating with an external ISM_xSMART radio transmission module

eSTER_x40 maintains the set room temperature and by transmitting information from the main regulator, informs about the fuel level in the tank, boiler alarm states, the need to clean the boiler or about the outside temperature's value. It provides complete configurability of the regulator menu from any room.

SETTING PARAMETERS AND SCHEDULES THROUGH MOBILE APPLICATION ecoNET

eSTER_x40 has 6 factory schedules

ADDITIONAL BENEFITS:

- ▶ Simple pairing with other devices
- ▶ Possibility to use several thermostats in one building, integrated with a single controller
- ▶ Long lifetime due to battery optimisation system
- ▶ Durable capacitive buttons
- ▶ High operation stability, due to the constant monitoring of the connection quality - work on multiple channels
- ▶ Fuel saving
- ▶ LBS system - minimizes the other devices interference
- ▶ Encrypted transmission - data security
- ▶ Adaptive regulation of set temperature in heating circuits
- ▶ Indicator of battery discharge
- ▶ Ease of configuration
- ▶ Parental lock
